-  Drafting

Hobbies/Interests

-  Sports
-  Music
-  Travel
-  Building
-  Photography
-  Urban Design
-  Art
-  Gardening
-  Cooking
-  Cycling

Hello, my name is Adam Petit and I am a recent M.Arch graduate from Laurentian University who is eager to begin an architectural internship through the OAA at a firm that encourages a collaborative and interdisciplinary approach to design. I am a motivated and responsible self starter with great research and communication skills, that is constantly looking to further my education. My previous architectural experience primarily entails working in residential architecture with a wide variety of responsibilities and tasks. Additionally, I have a keen interest in: sustainable architecture, landscape design, design build, urban design and urban agriculture.

Work Experience

Architectural Intern 04/18 - 08/19
Pro Vision Architecture Inc., Aurora, ON

- Worked directly with the principal architect on residential projects creating Revit models, conceptual proposals, visuals, and construction documents.
- Interacted closely with clients to ensure constant communication and positive design solutions throughout an iterative design process.
- Completed site visits and created landscaping documents for commercial and residential projects including: site plans, planting plans, and grading plans.
- Executed documents for municipal approvals such as: building matrix, code analysis, fire plans, and committee of adjustment applications.

Intermediate Designer/ Assistant Foreman 05/16 - 04/18
Aurora Landscape, Aurora, ON

- Worked under the guidance of a certified Landscape architect while gaining hands-on experience surveying and working with the lead foreman.
- Gained hands-on experience of landscape construction techniques.
- Completed concept and construction plans while collaborating with customers to ensure designs that were aesthetically pleasing and within a set budget.

Education

Master of Architecture (M.Arch) 09/18 - 04/20
Laurentian University, Sudbury, ON

- Thesis titled "Building Agriculture: An Architectural Investigation of a New Urban Farm Type to Establish Food Sovereignty In Regent Park, Toronto" focused on how agriculture can be integrated with architecture throughout urban environments to improve resiliency and sustainability of future cities.
- First year of M.Arch focused on wood craft at a macro and micro scale and incorporated a trip to Denmark to study the work of Danish designer Hans Wegner.

Bachelor of Architectural Studies (B.A.S) With Honours 09/14 - 04/18
Laurentian University, Sudbury, ON

- Design studios focused on working within teams and a design build mindset where hands on learning of materials and building techniques was vital.
- Studied sustainable and passive design strategies and how to implement them utilizing an approach which stressed vernacular design and place making.
- Engaged in a two moth summer design build program with 10 other students in Dinkelsbuhl Germany creating plans for the renovation of a 16th century timber home and constructing a small staircase for a local resident.

Certifications

- First Aid CPR/AED Level C
- WHIMIS

Travel

- Denmark, California, Chicago, Vancouver, Halifax, Germany, Barcelona, Amsterdam, Austria, Switzerland, Paris, Venice, Boston, Mexico.
